

*design for creatives,  
makers and doers*

## *Facebook Company Pages:*

When you first set up your company page, you were able to select a name for your company. HOWEVER, depending on the number of "likes" your page has, you may not have been allowed to use the company name within the address of the URL.

As examples (and I don't mean to specifically pick on them; there are many others like this!):

To get to the company named "HappyHeartBrainSoul", you actually have to type in the link "<https://www.facebook.com/366celebratedays/>" to get there. Another one is "Dunlop Bookkeeping Services" whose address is "<https://www.facebook.com/jdunlop1960/>"

Obviously this is not ideal when directing your customers! You can change this manually (only once!) by following these steps:

1. From your Company Page, click on "About" below your cover picture

2. Hover over "Facebook Company Address". You will see an "Edit" link appear on the right hand side.

*design for creatives,  
makers and doers*

Here is where you can select a better name for your company - ideally, one that matches your company name.
